## G lossary

for the

## Texas A cademic Performance Report ${ }^{\dagger}$

for 2012-13
Accountability Rating: This refers to the district and campus ratings assigned by the 2013 state accountability system. This year introduces a significant change for the accountability system. It is based on four performance indexes. For a more detailed explanation of this year's accountability system, see the 2013 Accountability M anual, available at:
http://ritter.tea.state.tx.us/perfreport/account/2013/manual/index.html
Possible ratings are:

- M et Standard;
- M et Alternative Standard;
- Improvement Required;
- Not Rated; and
- Not Rated: Data Integrity Issues.

Accountability Subset: This refers to the group of non-mobile students whose performance on the STAAR or TAKS is used in determining a school's and district's accountability rating. Specifically, the subsets have been calculated as follows:
Campus-level accountability subset: If a student was reported in membership at one campus on October 26, 2012,* but moves to another campus before the test, that student's performance was removed from the accountability results for both campuses, whether the campuses were in the same district or different districts. Campuses were held accountable only for those students reported to be enrolled in the campus in the fall and tested in the same campus in the second semester.
D istrict-level accountability subset: If a student was in one district on October 26, 2012,* but then moved to another district before the test, that student's performance was taken out of the accountability subset for both districts. However, if the student moved from campus to campus within the district, his or her performance was included in that district's results, even though it did not count for either campus. This means that district performance results do not match the sum of the campus performance results.
*In the case of STAAR End-of-Course exams administered in July of 2012, the accountability date is for the prior year, October 28, 2011.

STAAR Participation, included in the Performance Report, shows what percent of a district's or school's test takers are mobile and are not included in the A ccountability Subset. For additional information and examples of how the accountability subset is determined, see the 2013 Accountability M anual. Also see M obile, and STAAR Participation.

[^0]Advanced C ourse/Dual E nrollment C ompletion: This indicator is based on a count of students who complete and receive credit for at least one advanced course in grades 9-12. A dvanced courses include dual enrollment courses. Dual enrollment courses are those for which a student gets both high school and college credit. Deciding who gets credit for which college course is described in Texas A dministrative Code $\S 74.25$ which states, in part:
(b) To be eligible to enroll and be awarded credit toward state graduation requirements, a student must have the approval of the high school principal or other school official designated by the school district. The course for which credit is awarded must provide advanced academic instruction beyond, or in greater depth than, the essential knowledge and skills for the equivalent high school course.
Appendix B lists all courses identified as advanced, with the exception of courses designated only as dual enrollment. Dual enrollment courses are not shown, as the courses vary from campus to campus and could potentially include a large proportion of all high school courses.
Course completion information is reported by districts through the Public Education Information M anagement System (PEIM S) after the close of the school year. The values, expressed as a percent, are calculated as follows:
number of students in grades 9-12 who received credit for at least one advanced or dual enrollment course in 2011-12
number of students in grades 9-12 who completed at least one course in 2011-12
This indicator was used in awarding 2013 Distinction Designation to high schools. For a detailed explanation of Distinction Designations, see Chapter 6 of the 2013 Accountability M anual.

Special education students are included in the results shown for the campus or district and the individual student groups. For purposes of comparison, course completion rates are also shown for the prior year (2010-11). For a list of advanced courses, see Appendix B. (Source: PEIM S, J une 2012, J une 2011)
Advanced Placement Examinations: See AP/IB Results.
Annual Dropout R ate: A nnual dropout rates are shown for schools and districts with grades 7-8 and 9-12. Certain students are excluded from the annual dropout rate calculations, per Texas Education Code (TEC) Chapter 39:

1) students who are not eligible for state funding;
2) students who were court-ordered into a General Educational Development (GED) program, but who did not earn a GED;
3) students who have been incarcerated as adults;
4) students coded as refugees or asylees who have not received adequate schooling outside of the U nited States;
5) any students who were previously reported as dropouts to TEA ; and
6) students in county detention facilities outside of their home district.

Two annual dropout rate indicators are shown:
(1) Annual Dropout Rate (Gr 7-8). This includes only grades 7 and 8 . It is calculated as follows:
number of dropouts in grades 7 and 8 during the 2011-12 school year
number of grade 7 and 8 students who were in attendance at any time during the 2011-12 school year
(2) Annual Dropout Rate (Gr9-12). This includes grades 9 through 12. It is calculated as follows:
number of dropouts in grades 9 through 12 during the 2011-12 school year
number of grade 9-12 students who were in attendance at any time during the 2011-12 school year B oth annual rates appear on campus, district, region, and state-level TAPRs. However, the state and region annual dropout rates that are reported on district and campus TA PRs are calculated without exclusions.

N ote that with all annual dropout rate calculations, a cumulative count of students is used in the denominator. This method for calculating the dropout rate neutralizes the effects of mobility by including in the denominator every student ever reported in attendance at the campus or district throughout the school year, regardless of length of stay. For a more complete description of dropout rates and the change in exclusions, see the Secondary School Completion and Dropouts in Texas Public Schools, 2011-12 reports, available at
http://tea.texas.gov/index4.aspx?id=4080\& menu id=2147483698
See also Dropout and Leaver Record. (Source: PEIM S, Oct. 2011, Oct. 2012 and J une 2012)
AP/IB Results: These refer to the results of the College Board's A dvanced Placement (A P) examinations and the International B accalaureate's (IB) Diploma Program examinations taken by Texas public school students. High school students may take one or more of these examinations, ideally upon completion of AP or IB courses, and may receive advanced placement or credit, or both, upon entering college. Generally, colleges will award credit or advanced placement for scores of 3,4 , or 5 on AP examinations and scores of $4,5,6$, or 7 on IB examinations. Requirements vary by college and by subject tested.
The following two values are calculated for this indicator:
(1) Tested. This shows the percent of students in grades 11 and 12 taking at least one AP or IB examination, any subject:
number of grade 11 and 12 students taking at least one AP or IB examination
number of grade 11 and 12 students
(2) Examinees $>=$ Criterion. The percent of examinees with at least one AP or IB score at or above the criterion score ( 3 on AP or 4 on IB):
number of grade 11 and 12 examinees with at least one score at or above criterion
number of grade 11 and 12 students taking at least one AP or IB examination
This indicator was used in awarding 2013 Distinction Designation to high schools. For a detailed explanation of Distinction Designations, see Chapter 6 of the 2013 Accountability M anual. (Sources: The C ollege Board, Aug. 2012, J an. 2012; The International Baccalaureate Organization, Aug. 2012, Aug. 2011; and PEIM S, 0 ct. 2012, Oct. 2011)

ARD: This refers to the A dmission, Review, and Dismissal committee that determines the individual education plan for every student served in special education. See also Special Education and STAAR Participation.
At-Risk: A student is identified as at risk of dropping out of school based on state-defined criteria (§TEC 29.081). At-risk status is obtained from the PEIM S 110 records. The percent of at-risk students is calculated as the sum of the students coded as at risk of dropping out of school, divided by the total number of students in membership:
number of students coded as at-risk
total number of students
Counts of at-risk students are shown in the P rofile section of the campus, district, region, and state reports.
The statutory criteria for at-risk status include each student who is under 21 years of age and who:

1) was not advanced from one grade level to the next for one or more school years;
2) is in grades $7,8,9,10,11$, or 12 and did not maintain an average equivalent to 70 on a scale of 100 in two or more subjects in the foundation curriculum during a semester in the preceding or current school year or is not maintaining such an average in two or more subjects in the foundation curriculum in the current semester;
3) did not perform satisfactorily on an assessment instrument administered to the student under TEC Subchapter B, Chapter 39, and who has not in the previous or current school year subsequently performed on that instrument or another appropriate instrument at a level equal to at least 110 percent of the level of satisfactory performance on that instrument;
4) is in prekindergarten, kindergarten or grades 1, 2, or 3 and did not perform satisfactorily on a readiness test or assessment instrument administered during the current school year;
5) is pregnant or is a parent;
6) has been placed in an alternative education program in accordance with §TEC 37.006 during the preceding or current school year;
7) has been expelled in accordance with §TEC 37.007 during the preceding or current school year;
8) is currently on parole, probation, deferred prosecution, or other conditional release;
9) was previously reported through the PEIM S to have dropped out of school;
10) is a student of limited English proficiency, as defined by §TEC 29.052;
11) is in the custody or care of the Department of Protective and Regulatory Services or has, during the current school year, been referred to the department by a school official, officer of the juvenile court, or law enforcement official;
12) is homeless, as defined by 42 U.S.C. Section 11302 and its subsequent amendments; or
13) resided in the preceding school year or resides in the current school year in a residential placement facility in the district, including a detention facility, substance abuse treatment facility, emergency shelter, psychiatric hospital, halfway house, or foster group home.
(Sources: PEIM S, 0 ct. 2012; Texas Education Code)
Attendance $\mathbf{R}$ ate: A ttendance rates reported in the TA PR are based on student attendance for the entire school year. Only students in grades 1-12 are included in the calculations. A ttendance is calculated as follows:
total number of days students were present in 2011-12
total number of days students were in membership in 2011-12
A ttendance rates are shown for 2011-12 and 2010-11.
This indicator was used in awarding 2013 Distinction Designations. For a detailed explanation of Distinction D esignations, see Chapter 6 of the 2013 Accountability M anual. (Source: PEIM S, J une 2012, J une 2011)
Auxiliary Staff (District Profile only): This shows the Full-Time Equivalent (FTE) count of staff reported without a role but with a PEIM S employment and payroll record. Counts of auxiliary staff are expressed as a percent of total staff. For auxiliary staff, the FTE is simply the value of the percent of day worked. (Source: PEIM S, Oct. 2012)
Average Actual Salaries (regular duties only): For each professional staff type, the total salary is divided by the total FTE count of staff who receives that salary. The total actual salary amount is pay for regular duties only and does not include supplemental payments for coaching, band and orchestra assignments, and club sponsorships. See Appendix A for lists of the PEIM S role IDs included in each category shown.

- Teachers. This includes teachers, special duty teachers, and substitute teachers. Substitute teachers are persons hired to replace a teacher who has quit, died, or been terminated; or, persons permanently hired on an as-needed basis.
- Campus Administration. This includes principals, assistant principals, and other administrators reported with a specific school ID.
- Central Administration. This includes superintendents, presidents, chief executive officers, chief administrative officers, business managers, athletic directors, and other administrators that are reported with a central office ID and not a specific school ID.
- Professional Support. This includes therapists, nurses, librarians, counselors, and other campus professional personnel.
A half-time employee with a reported actual sal ary of $\$ 30,000$ has a full-time equivalent salary of $\$ 60,000$. All average salaries are expressed in full-time equivalent form by dividing the sum of the actual salaries earned by the total FTE count. (Source: PEIM S, Oct. 2012)

A verage Teacher Salary by Y ears of Experience (regular duties only): Total pay for teachers within each experience group is divided by the total teacher FTE for the group. The total actual salary amount is pay for regular duties only and does not include supplements. For teachers who also have non-teaching roles, only the portion of time and pay dedicated to
classroom responsibilities is factored into the average teacher sal ary cal culation. (Source: PEIMS, Oct. 2012)
A verage Y ears Experience of Teachers: W eighted averages are obtained by multiplying each teacher's FTE count by years of experience. These amounts are summed for all teachers and divided by the total teacher FTE count, resulting in the averages shown. This measure refers to the total number of (completed) years of professional experience for the individual in any district. (Source: PEIM S, Oct. 2012)
A verage $Y$ ears Experience of Teachers with District: W eighted averages are obtained by multiplying each teacher's FTE count by years of experience. These amounts are summed for all teachers and divided by the total teacher FTE count, resulting in the averages shown. This measure refers to tenure, i.e., the number of years employed in the reporting district, whether or not there has been any interruption in service.
Bilingual Education/E nglish as a Second Language Reports (District P erformance only): State law requires districts to report performance for selected indicators disaggregated by bilingual and ESL instructional models. To accommodate this requirement, the TAPR shows the statutorily-required performance indicators disaggregated by twelve columns for students identified as limited English proficient (LEP) in the current school year.
Current LEP students receiving either Bilingual Education (BE) or English as a Second Language (ESL) program services are presented as a total as well as disaggregated by program instructional model within BE and ESL. Results are also shown for current LEP students who did not receive any $B E / E S L$ services and for current LEP students receiving any services.
The indicators shown are: the 2013 accountability base indicator; the SSI indicators (measures 1 and 2 only), and the Progress of Prior $Y$ ear Failers (percent passing only).
These indicators are cal culated and reported on the district, region, and state TA PRs. The information is not calculated or reported at the campus level.
For more information on these indicators, see STAAR, Student Success Initiative, and Progress of Prior Year STAAR F ailers. For definitions of the BE/ESL instructional model types, see the PEIMS D ata Standards, at http://tea.texas.gov/index4.aspx?id=25769817517
Campus Group: As of 2012-13, campus group is no longer a disaggregation on the campus performance reports.
C ampus Number: The campus number is the unique 9 -digit identifying number assigned to every Texas public school. It consists of the county number (assigned alphabetically from 001 to 254), followed by the district number ( 9 _ _ is used primarily for regular districts, 8 _ for charter operators), and ending with the campus number (generally 00 _ for high schools, 04 for middle schools, and 1_ for elementary schools).
Class Size A verages by Grade and Subject: These values show the average class size for elementary classes (by grade) and for secondary classes (by subject) for selected subjects. Districts report class sizes through the PEIM S 090 (Staff Responsibility) record. Each 090 record is unique by campus ID, staff ID, service ID, and class ID number.
The methodology for averaging class size differs depending on whether the class is elementary or secondary due to differences in reporting practices for these two types of
teacher schedules. For secondary classes, each unique combination of teacher and class time is counted as a class. A verages are determined by summing the number of students served (in a given subject at the campus) and dividing by the calculated count of classes.
For elementary classes, the number of records reported for each grade is considered. A teacher teaching all subjects to the same group of fourth graders all day will have only one record indicating the total number of fourth grade students served. How ever, an elementary teacher who teaches a single subject to five different sections of fourth graders each day will have five separate records reported, each with a unique count of students served. For example, one $4^{\text {th }}$ grade science teacher teaches 5 science classes each day with: $18,20,19,21$, and 22 students in the different classes. That is a total of 100 students taught in 5 sections, 100 divided by 5 gives an average class size of 20 for that teacher.
The following rules apply to the average class sizes:

1) classes identified as serving regular, compensatory/remedial, gifted and talented, career and technical, and honors students are included in the calculation;
2) subjects in the areas of English language arts, mathematics, science, social studies, foreign language, computer science, business education, career and techni cal, and selfcontained are included in the calculation;
3) classes where the number of students served is reported to be zero are not included;
4) service codes with the "SR " prefix are not included;
5) teacher roles coded as "teacher" and/or "substitute teacher" are included;
6) only class settings coded as "regular class" are included in the calculation;
7) missing partial FTE counts are not included;
8) elementary classes where the number of students exceeds 100 are not included.
(Source: PEIMS, Oct. 2012)
College Admissions Tests: See SAT/ACT Results.
College Readiness I ndicators: These indicators are grouped together to help provide a picture of college preparedness at a given high school or for a specific district. They can be used by educators as they work to ensure that students are able to perform college-level course work at institutions of higher education.
The indicators include:

- Advanced Course/Dual Enrollment Completion;
- Recommended High School Program/Distinguished A chievement Program Graduates;
- AP/IB Results;
- Texas Success Initiative (TSI) Higher Education Readiness Component;
- SAT/ACT Results;
- College-Ready Graduates;
- Graduates Enrolled in a Texas Institution of Higher Education (IHE); and
- Graduates in a Texas IHE Completing One Y ear W ithout Remediation

For more information, refer to the individual definitions in this glossary.
College-R eady Graduates: To be considered college-ready as defined by this indicator, a graduate must have met or exceeded the college-ready criteria on the TAK S exit-level test, or the SA T test, or the ACT test. The criteria for each are:

| Subject | Exit-level TAKS |  | SAT |  | ACT |
| :---: | :---: | :---: | :---: | :---: | :---: |
| ELA | $>=2200$ scale score on ELA test <br> AND | $O R$ | $>=500$ on Critical R eading <br> AND <br> $>=1070$ Total | OR | $>=19$ on English <br> AND <br> $>=23$ Composite |
| Math | $>=2200$ scale score on <br> mathematics test | $O R$ | $>=500$ on Math <br> AND <br> $>=1070$ Total | OR | $>=19$ on Math <br> AND <br> $>=23$ Composite |

Three values are calculated for this indicator:
(1) Eng Lang Arts. This shows the percent of graduates who scored at or above the criterion score on the TAKS, SAT, or ACT English language arts tests.
number of graduates who scored at or above the College-Ready criterion for ELA
number of graduates (class of 2012) with ELA results to evaluate
(2) M athematics. This shows the percent of graduates who scored at or above the criterion score on the TAKS, SAT, or ACT mathematics tests.
number of graduates who scored at or above the College-Ready criterion for mathematics
number of graduates (class of 2012) with mathematics results to evaluate
(3) Both Subjects. This shows the percent of graduates who scored at or above the criterion score on both the TAKS, SAT, or ACT ELA and mathematics tests.
number of graduates who scored at or above the College-Ready criteria on both ELA \& mathematics
number of graduates (class of 2012) with results in both subjects to evaluate
This indicator differs from the TSI - Higher Education Readiness Component, in several ways:

- it includes performance on the SAT and ACT;
- it is based on prior year graduates rather than current year $11^{\text {th }}$ graders;
- it provides an overall measure of both subjects combined; and
- performance is tied to the campus and district where the student graduated, while the TSI indicator uses the campus and district where the TAKS tests were administered.
Performance is shown for the class of 2012 and 2011. Note that this indicator does not include performance on TAK S-M odified nor TAK S-A Iternate.
(Sources: TEA Student Assessment Division, The College Board, Aug. 2012, Aug. 2013, ACT, Inc. Oct. 2012, 0 ct. 2011; and PEIM S, 0 ct. 2012, 0 ct. 2011)

Completion R ate: See Longitudinal Rates.
Criterion Score: This refers to the scores on the SAT and ACT college admissions tests, the A P and IB tests, and the College-R eady Graduates indicator. For the college admissions tests, the criterion scores are at least 24 on the ACT (composite) and at least 1110 on the SAT (critical reading and mathematics combined). For AP and IB tests, the criterion scores are at least 3 on A P tests, and at least 4 on IB tests. For College-R eady Graduates criterion scores, see College-R eady Graduates.

Please note that each college and university establishes its own score criteria for admitting or granting advanced placement or credit to individual students. See also SAT/ACT Results and AP/IB Results.
Data Quality (District Profile only): The TA PRs show the percent of errors a district made in two key data submissions: 1) the PID E rror rate in PEIM S Student Data, and 2) the percent of U nderreported Students in PEIM S Student Leaver Data.
(1) PID Error Rate. The Person Identification Database (PID) system ensures that each time information is collected for a student the identifying information matches other data collections for that student. This allows student data to be linked, such as enrollment records, which are collected in October, to attendance records, which are collected in June; or data to be matched across years. It also helps maintain student confidentiality by assigning an ID that does not divulge the student's identifying information.
During the data submission process each district has the ability to run PID Discrepancy Reports that show any PID errors found. The district then has time to correct the errors before its submission is finalized. W hile the PID error rate has declined significantly over the years, any amount of error has a detrimental effect on the calculation of longitudinal measures such as the 4-year dropout rate and the high school Iongitudinal rate. The TA PRs show the PID error rate in PEIM S Student Data, collected in Submission 1 (October 2012).
The rate is calculated as follows:
number of student PID errors found in PEIMS submission 1 (fall 2012)
number of student records in PEIMS submission 1 (fall 2012)
(2) Percent of U nderreported Students. U nderreported students are $7^{\text {th }}-12^{\text {th }}$ graders who were enrolled at any time the prior year and who were not accounted for through district records or TEA processing in the current year. A district is required to submit a leaver record for any student served in grades 7-12 the previous year, unless the student received a GED certificate by A ugust 31, is a previous Texas public school graduate, moved to and enrolled in another Texas public school district, or returned to the district by the end of the school start window (for 2012-13 the end of the school-start window was September 28, 2012). For students who attended in 2011-12, there were 17 possible leaver reasons, including graduated, died, or dropped out. (For a more complete definition of leavers, see Leaver Records.)

The rate is calculated as follows:
number of underreported students
number of grade 7-12 students who were served in the district in the 2011-12 school year

Distinction Designations: Distinction Designations are awarded to campuses for high performance on indicators other than those used to determine accountability ratings. The distinctions are awarded for:

- Top $25 \%$ Student Progress;
- A cademic A chievement in Reading/English language arts (ELA ); and
- A cademic A chievement in M athematics.

N ote that campuses with state accountability ratings of "Improvement Required" or "Not Rated" or those evaluated under the alternative education accountability provisions are not eligible for these distinctions. See Chapter 6 in the 2013 Accountability Manual for more information.
Distinguished Achievement Program: See RHSP/DAP G raduates.
Dropout: A dropout is a student who is enrolled in public school in Grades 7-12, does not return to public school the following fall, is not expelled, and does not graduate, receive a GED, continue school outside the public school system, begin college, or die.
Dropout counts are obtained from PEIMS records. Based on the attendance and enrollment records of all districts, the records of Texas graduates for the last several years, and GED certificate recipient records, TEA identifies students for whom districts do not need to submit leaver reasons. School districts must account for all other students through the submission of leaver reasons. The leaver record provides 17 possible reasons for leaving school in 2011-12, including three which may indicate the student is a dropout (reason codes $88,89,98$ ). For more information, see Annual Dropout Rate. (Source: PEIM S, Oct. 2012)
Dropout Rate: See Annual Dropout Rate.
E conomically Disadvantaged: The percent of economically disadvantaged students is cal culated as the sum of students coded as eligible for free or reduced-price lunch or eligible for other public assistance, divided by the total number of students:
number of students coded as eligible for free or reduced-price lunch or other public assistance
total number of students
See also Campus Group and Total Students. (Source: PEIM S, 0 ct. 2012, 0 ct. 2011; and TEA Student Assessment Division)
Educational Aides: Educational aides are staff who are reported with a role of 033 (Educational A ide) or 036 (Certified Interpreter). These aides are referred to as paraprofessional staff. The FTE counts of educational aides are expressed as a percent of the total staff FTE. (Source: PEIMS, Oct. 2012)
English Language Learner (ELL): These are students identified as having limited English proficiency (LEP), or English language learners, by the Language Proficiency A ssessment Committee (LPAC) according to criteria established in the Texas A dministrative Code. Not all students identified as ELL receive bilingual or English as a second language instruction, although most do. In the P rofile section of the reports, the percent of ELL students is cal culated by dividing the number of ELL students by the total number of students in the school or district.

The ELL column in the P erformance section shows the performance of students identified as ELL in the current year only; students who are no longer considered as English language learners are not included in this column. Note that the descriptors "English Language Learner" and "Limited English Proficient (LEP)" may be used interchangeably. (Source: PEIMS, Oct. 2012)
Enrollment: See Total Students.
Ethnic Distribution: Students and staff are reported as A frican A merican, Hispanic, W hite, A merican Indian, A sian, Pacific Islander, and Two or M ore Races. In the Profile section, both counts and percentages of the total number of students and staff in each of these categories are shown.

For some graduation rates the groups of A sian, Pacific Islander, and Two or M ore Races have no data available for the prior school year since the former definitions were in use that year.
(Source: PEIM S, Oct. 2012, Oct. 2011; The C ollege B oard; ACT Inc.; The International Baccalaureate Organization; and TEA Student Assessment Division)
Expenditure Information: This information is now available on the PEIM S F inancial Standard Reports, at:
http://tea.texas.gov/index2.aspx?id=25769817584
FTE: Full-Time Equivalent.
Fund Balance Information: This information is now available on the PEIMS F inancial Standard Reports, at:
http://tea.texas.gov/index2.aspx?id=25769817584
G raduates (Class of 2012): Shown in the Profile section, this is the total number of graduates (including summer graduates) for the 2011-12 school year, as reported by districts in the fall of 2012. The value includes $12^{\text {th }}$ graders who graduated as well as graduates from other grades. Students in special education who graduate are included in the totals, and are al so reported as a separate group. Special education graduates are students who graduated with a special education graduation type code or who received special education services their entire senior year (as determined by attendance data). Counts of students graduating under the recommended high school or distinguished achievement programs are also shown.
Students graduating with the class of 2012 could be coded with one of the following graduation types:

- M inimum High School Program
- Recommended High School Program
- Distinguished A chievement Program
- Special Education student completing an individualized education program (IEP)

Counts of graduates are calculated slightly differently for three graduation-related indicators on the Performance section of the TAPR:

- The RHSP/DAP (Recommended High School Program/Distinguished Achievement Program) indicator as well as the College-Ready Graduates indicator include all graduates, special education and non-special education, in both the numerator and denominator.
See also College-Ready Graduates, Longitudinal Rate, and RHSP/DAP Graduates. (Source: PEIMS, Oct. 2012)
G raduates E nrolled in Higher E ducation: This indicator is new for 2012-13. Texas Education Code $\S 39.301(\mathrm{c})(11)$ and (12) require the A gency to report the following indicators on the TAPR:
(1) Graduates Enrolled in TX Institution of Higher Education (IHE). This is the percentage of students who enroll and begin instruction at an institution of higher education in the school year following high school graduation. The rate is determined as follows:

> number of graduates during the 2010-11 school year who attended a public or independent college or university in Texas in the 2011-12 academic year
number of graduates during the 2010-11 school year
Students not Included. The values shown in (1) are provided by the Texas Higher Education Coordinating B oard (THECB) and do not include students who enrolled in inor out-of-state non-public career schools or out-of-state colleges or universities.
Students Included. The values in (1) include students who attend public community colleges in Texas.
(2) Graduates in TX IHE C ompleting One Year Without Remediation. This shows the percent of students who enrolled and began instruction at an institution of higher education in the school year following high school graduation and did not require a developmental education course based on the Texas Success Initiative. The rate is determined as follows:
number of graduates during the 2010-11 school year who enrolled in a public college or university in Texas in the school year following the year they graduated and
met the Texas Success Initiative requirement in all subject areas (reading, writing, and mathematics) and therefore were not required to enroll in a developmental education course
number of graduates during the 2010-11 school year who enrolled in a public college or university in Texas in the school year following the year they graduated

Students Not Included. The values shown in (2) are provided by the THECB and do not include students who enrolled in independent colleges or universities in Texas, in- or out-of-state non-public career schools, or out-of-state colleges or universities.
Students Included. The values in (2) include students who attended Texas public two- or four-year institutions of higher education. Texas Success Initiative requirements apply only to students attending Texas public institutions.
Other reports showing students enrolled in Texas public colleges and universities are available at the THECB site at:

> http://www.txhighereddata.org/generatelinks.cfm?Section=HS2Col

For more information on this indicator, contact the Texas Higher Education Coordinating Board at (512) 427-6153. (Source: Texas Higher Education C oordinating Board, F all 2013)

Graduation Rate: See Longitudinal Rates.
Instructional Expenditure Ratio (2011-12): This information is now available on the PEIMS Financial Standard Reports, at:
http://tea.texas.gov/index2.aspx?id=25769817584
Instructional Staff Percent (District Profile only): This measure, required by TEC 44.0071, indicates the percentage of the district's full-time equivalent employees whose job function was to directly provide classroom instruction to students during the 2012-13 school year. The instructional staff percent is a district-level-only measure, and is calculated as follows:
total number of hours district staff reported under expenditure
object codes 6112, 6119, and 6129, and function codes $11,12,13$, and 31
total number of hours worked by all district employees
Contact the School Financial A udits Division at (512) 463-9095 for further details about this measure. (Source: PEIM S, 0 ct. 2012)

International Baccalaureate (IB): See AP/IB Results.
Leaver Record: In determining the status of prior year $7^{\text {th }}$ through $12^{\text {th }}$ grade students who are no longer enrolled at a Texas public school, TEA reviews attendance and enrollment records of all districts, the records of Texas graduates for the last several years, and GED certificate records to identify students for whom districts do not need to submit leaver records. Districts, for their part, are required to submit a leaver code for all other students. This group of "leavers" includes students such as those who graduated, enrolled in school in another state, returned to their home country, died, or dropped out. This information is sent to TEA in Submission 1 of the annual PEIMS data collection.

See D ata Quality. (Source: PEIMS, Oct. 2012; Secondary School Completion and Dropouts in Texas Public Schools, 2011-12, Texas Education Agency)
Limited English Proficient (LEP): See English Language Learner.
Longitudinal Rates: This indicator shows the status of a group (cohort) of students after four years in high school (4-Year Longitudinal Rate); after five years in high school ( $5-\mathrm{Y}$ ear Extended Longitudinal Rate); or after six years in high school (6-Year Extended Longitudinal Rate).
For the 4-Year Longitudinal Rate, the cohort consists of students who first attended ninth grade in 2008-09. They are followed through their expected graduation with the class of 2012.
For the 5 -Year Extended Longitudinal Rate, the cohort consists of students who first attended ninth grade in 2007-08. They are followed for five years, to see if they graduated within a year after their expected graduation with the class of 2011.
For the 6-Year Extended Longitudinal Rate, the cohort consists of students who first attended ninth grade in 2006-07. They are followed for six years, to see if they graduated within two years after their expected graduation with the class of 2010.
Cohorts:

- A student who transfers into the cohort is one who, for example, moves into the cohort from another high school in Texas or from out of state.
- A student who transfers out of the cohort is one who, for example, moves to another public high school in Texas. N ote that these students are then transferred into the cohort of the receiving high school and district. There are also students who move out of the state or out of the country, or students who transfer to private schools or who are home-schooled. These types of transfers cannot be tracked, and students who leave for these reasons are not included in longitudinal rate cal culations.
- Students do not change cohorts even if they repeat a grade or skip a grade. If they begin with the 2008-09 ninth grade cohort, they remain with that cohort. This means, for example, that a student who started the ninth grade in 2008-09, but takes 5 years to graduate (i.e., in M ay 2013) is still part of the 2012 cohort; they are not switched to the 2013 cohort. This student would be considered a continuing student, and counted as part of the C ontinued HS number for the class of 2012. This is true as well for the 5-year and 6year extended longitudinal cohorts.
There are four student outcomes used in computing each longitudinal rate:

## 4-Year Longitudinal Rate

(1) Graduated. Based on the 2008-09 cohort, this shows the percent who received their high school diploma on time or earlier - by A ugust 31, 2012. It is calculated as follows:
number of students from the cohort who received a high school diploma by August 31, 2012
number of students in the 2008-09 cohort*
(2) Received GED. B ased on the 2008-09 cohort, this shows the percentage who received a General Educational Development certificate by A ugust 31, 2012. It is calculated as follows:
number of students from the cohort who received a GED by August 31, 2012
number of students in the 2008-09 cohort*
(3) Continued High School. B ased on the 2008-09 cohort, this shows the percentage still enrolled as students in the fall of the 2012-13 school year. It is calculated as follows: number of students from the cohort who were enrolled in the fall of the 2012-13 school year
number of students in the 2008-09 cohort*
(4) Dropped Out. B ased on the 2008-09 cohort, this shows the percentage who dropped out and did not return by the fall of the 2012-13 school year. It is calculated as follows:
number of students from the cohort who dropped out before the fall of the 2012-13 school year
number of students in the 2008-09 cohort*
(5) Graduates \& GED. B ased on the 2008-09 cohort, this shows the percent of graduates and GED recipients. It is calculated as follows:
number of students from the cohort who received a high school diploma by August 31, 2012 plus number of students from the cohort who received a GED by August 31, 2012
number of students in the 2008-09 cohort*
(6) Graduates, GED \& Cont. B ased on the 2008-09 cohort, this shows the percent of graduates, GED recipients, and continuers. It is calculated as follows:
number of students from the cohort who received a high school diploma by August 31, 2012 plus number of students from the cohort who received a GED by August 31, 2012 plus number of students from the cohort who were enrolled in the fall of the 2012-13 school year number of students in the 2008-09 cohort* $^{*}$

## 5-Year Extended Longitudinal Rate

(1) Graduated. B ased on the 2007-08 cohort, this shows the percent who received their high school diploma by A ugust 31, 2012. It is calculated as follows:
number of students from the cohort who received a high school diploma by August 31, 2012
number of students in the 2007-08 cohort*
(2) Received GED. B ased on the 2007-08 cohort, this shows the percentage who received a GED certificate by A ugust 31, 2012. It is calculated as follows:
number of students from the cohort who received a GED by August 31, 2012
number of students in the 2007-08 cohort*
(3) Continued High School. Based on the 2007-08 cohort, this shows the percentage still enrolled as students in the fall of the 2012-13 school year. It is calculated as follows: number of students from the cohort who were enrolled in the fall of the 2012-13 school year
number of students in the 2007-08 cohort*
(4) Dropped Out. B ased on the 2007-08 cohort, this shows the percentage who dropped out and did not return by the fall of the 2012-13 school year. It is calculated as follows:
number of students from the cohort who dropped out before the fall of the 2012-13 school year
number of students in the 2007-08 cohort*
(5) Graduates \& GED. Based on the 2007-08 cohort, this shows the percent of graduates and GED recipients. It is calculated as follows:
number of students from the cohort who received a high school diploma by August 31, 2012 plus number of students from the cohort who received a GED by August 31, 2012

## number of students in the 2007-08 cohort*

(6) Graduates, GED \& Cont. B ased on the 2007-08 cohort, this shows the percent of graduates, GED recipients, and continuers. It is calculated as follows:
number of students from the cohort who received a high school diploma by August 31, 2012 plus number of students from the cohort who received a GED by August 31, 2012 plus number of students from the cohort who were enrolled in the fall of the 2012-13 school year
number of students in the 2007-08 cohort*

* The cohort in the denominator of the formulas shown (for class of 2011 and 2012) above includes those students who graduated, continued in school, received a GED, or dropped out. It does not include data errors or leavers with the leaver reason codes $03,16,24,60,66,78,81,82,83,85$, 86,87 , or 90 . Also, this rate is shown with exclusions that are mandated by state statute. See Annual Dropout Rate for a list of the exclusions.

## 6-Year Extended Longitudinal Rate

(1) Graduated. Based on the 2006-07 cohort, this shows the percent who received their high school diploma by A ugust 31, 2012. It is calculated as follows:
number of students from the cohort who received a high school diploma by August 31, 2012
number of students in the 2006-07 cohort**
(2) Received GED. Based on the 2006-07 cohort, this shows the percentage who received a GED certificate by A ugust 31, 2012. It is cal culated as follows:
number of students from the cohort who received a GED by August 31, 2012
number of students in the 2006-07 cohort**
(3) Continued High School. B ased on the 2006-07 cohort, this shows the percentage still enrolled as students in the fall of the 2012-13 school year. It is cal culated as follows:
number of students from the cohort who were enrolled in the fall of the 2012-13 school year
number of students in the 2006-07 cohort**
(4) Dropped Out. B ased on the 2006-07 cohort, this shows the percentage who dropped out and did not return by the fall of the 2012-13 school year. It is cal culated as follows:
number of students from the cohort who dropped out before the fall of the 2012-13 school year
number of students in the 2006-07 cohort**
(5) Graduates \& GED. B ased on the 2006-07 cohort, this shows the percent of graduates and GED recipients. It is calculated as follows:
number of students from the cohort who received a high school diploma by August 31, 2012 plus number of students from the cohort who received a GED by August 31, 2012
number of students in the 2006-07 cohort**
(6) Graduates, GED \& Cont. B ased on the 2006-07 cohort, this shows the percent of graduates, GED recipients, and continuers. It is calculated as follows:
number of students from the cohort who received a high school diploma by August 31, 2012 plus number of students from the cohort who received a GED by August 31, 2012 plus number of students from the cohort who were enrolled in the fall of the 2012-13 school year
number of students in the 2006-07 cohort**
** The cohort in the denominator above includes those students who graduated, continued in school, received a GED, or dropped out. It does not include data errors or leavers with leaver reason codes $03,16,24,60,66,78,81,82,83,85,86,87$, or 90 . N ote that students excluded by statute from the class of 2012 and 2011 are not excluded from this rate.

The graduation, continuation, GED recipient and dropout rates sum to 100\% (some totals may not equal exactly $100 \%$ due to rounding).
Federal Graduation Rates. In addition to the detailed breakdown of the 4-, 5- and 6-year longitudinal rates, the TA PRs show federal graduation rates, without exclusions, for the following:
(1) 4-Year F ederal Graduation Rate (Gr 9-12). This cohort consists of students who first attended ninth grade in 2008-09. They are followed through their expected graduation with the class of 2012. It is calculated as follows:
number of students from the cohort who received a high school diploma by August 31, 2012
number of students in the 2008-09 cohort ***
(2) 5-Year Extended F ederal Graduation Rate (Gr 9-12). This cohort consists of students who first attended ninth grade in 2007-08. They are followed for five years, to see if they graduated within a year after their expected graduation with the class of 2011. It is calculated as follows:
number of students from the cohort who received a high school diploma by August 31, 2012
number of students in the 2007-08 cohort***
***The cohort in the denominator above includes those students who graduated, continued in school, received a GED, or dropped out. It does not include data errors or leavers with leaver reason codes $03,16,24,60,66,78,81,82,83,85,86,87$, or 90 . Students with leaver codes 88 and 89 are included in the federal rates.

Longitudinal rates for districts serving Texas Y outh Commission or Texas J uvenile Probation Commission facilities do not include students from the facilities unless the students have been attributed to regular campuses in the district of service through campus of accountability procedures. Special Education students who graduate with an Individualized Education Program (IEP) are included as graduates.

For further information on these rates, see the report Secondary School Completion and Dropouts in Texas Public Schools, 2011-12. (Sources: PEIM S, Oct. 2012, June 2012, 0 ct. 2011, J une 2011, Oct. 2010, J une 2010, Oct. 2009, J une 2009, Oct. 2008, J une 2008, Oct. 2007, J une 2007, and General Educational D evelopment Information File)
M obility (Campus Profile only): A student is considered to be mobile if he or she has been in membership at the school for less than $83 \%$ of the school year (i.e., has missed six or more weeks at a particular school).

## number of mobile students in 2011-12

number of students who were in membership at any time during the 2011-12 school year
This rate is calculated at the campus level. The mobility rate shown in the Profile section of campus reports under the "district" column is based on the count of mobile students identified at the campus level. That is, the district mobility rate reflects school-to-school mobility, within the same district or from outside the district. See al so C ampus G roup. (Source: PEIM S, June 2012)
n/a: This indicates that data are not available or are not applicable.
Non-E ducationally Disadvantaged: This is the complementary count and percent to Economically Disadvantaged. That is, it is defined as those students not eligible to participate in free or reducedprice lunch or to receive any other public assistance.
Number of Students per Teacher: This shows the total number of students divided by the total teacher FTE count. (Source: PEIM S, Oct. 2012)

Paired Schools: For accountability purposes, schools that reported enrollment but did not have grades in which the state-mandated test was given (e.g. K-2 schools), are paired with schools with which they have a "feeder" relationship to determine accountability ratings. For example, assuming Travis Primary (K-2) feeds students into Navarro Elementary (3-5), the district would pair these two schools for accountability purposes. This means that the performance index outcome of Navarro Elementary is also used for rating Travis Primary. See Chapter 7 in the 2013 Accountability M anual.

PBM Special E ducation M onitoring Results Status: This label appears on the cover of TA PRs for districts with a special education monitoring status. For an explanation of each label, see Appendix C.

Professional Staff: This is a full-time equivalent (FTE) count of teachers, professional support staff, campus administrators, and, on the district profile, central administrators. Staff are grouped according to the PEIM S roles reported. Each type of professional staff is shown as a percentage of the total staff FTE. See also Appendix A. (Source: PEIM S, Oct. 2012)
Progress of Prior Y ear STAAR Failers (Percent of F ailers Passing STAAR): This indicator shows the percent of students in grade 4-8 who failed the STAAR (including STAAR A lternate or STA A R M odified) in the prior year but passed the corresponding assessment in the current year. For 2013, the reported values for reading/ELA and mathematics are cal culated as:
number of matched students who failed in 2012 but passed in 2013
number of matched students who failed in 2012
For 2013, students included in these measures are those who:

- took the spring 2013 STAA R reading/ELA and/or mathematics tests in grades 4-8. This indicator does not include grade 3 test takers in 2013 since that is their first STA AR test;
- are part of the 2013 A ccountability Subset;
- can be matched to the spring 2012 STAAR administration - anywhere in the state- to find their prior year score for reading/ELA and/or mathematics;
- failed the 2012 STAAR administration of reading/ELA and/or mathematics.
(Source: TEA Student Assessment Division)
Progress of Prior Y ear TAK S Failers (Percent of F ailers Passing TAKS): This indicator shows the percent of students in grade 11 who failed the TAK S in the prior year but passed the corresponding assessment in the current year. For 2013, the reported values for ELA and mathematics are calculated as:
number of matched students who failed in 2012 but passed in 2013
number of matched students who failed in 2012
For 2013, students included in these measures are those who:
- took the spring 2013 TA K S ELA and/or mathematics tests in grade 11;
- are part of the 2013 A ccountability Subset;
- can be matched to the spring 2012 TAK S administration - anywhere in the state - to find their prior year score for ELA and/or mathematics;
- failed the 2012 TAKS administration of ELA and/or mathematics.
(Source: TEA Student Assessment Division)
Recommended High School Program: See RHSP/DAP Graduates.
Retention Rates by G rade: The retention rate, reported in the Profile section, shows the percent of students in Texas public schools who enrolled in the fall of 2012-13 in the same grade as their grade in the last reported six-week period of the prior year (2011-12). It is calculated as follows:
total students not advanced to the next grade
total students advanced to the next grade + total students not advanced to the next grade
Special education retention rates are calculated and reported separately from the rates of nonspecial education students because local retention practices differ greatly between these two populations of students.
The TA PR only shows retention rates for grades K-8. Retention rates for all grades can be found in Grade-Level Retention in Texas Public Schools, 2011-12, available from TEA. (Source: PEIM S, $O$ ct. 2012, J une 2012)
Revenue Information: This information is now available on the PEIM S Financial Standard Reports, at:

## http://tea.texas.gov/index2.aspx?id=25769817584

RHSP/DAP Graduates: This indicator shows the percent of graduates who were reported as having satisfied the course requirements for the Texas State B oard of Education Recommended High School Program or Distinguished A chievement Program. It is calculated as follows:
number of graduates reported with graduation codes for
Recommended High School Program or Distinguished Achievement Program
number of graduates
RHSP graduates are students with type codes of $15,19,22,25$ or 28 ; DA P graduates are students with type codes of 17, 20, 23, 26 or 29 . See the PEIM S D ata Standards for more information. Results are shown for the class of 2012 and the class of 2011. See also Graduates. (Source: PEIM S, Oct. 2012, Oct. 2011)
SAT/ACT Results: These include the College B oard's SAT and ACT, Inc.'s ACT A ssessment. B oth testing companies annually provide the agency with testing information on the most recent test participation and performance of graduating seniors from all Texas public schools. Only one record is sent per student. If a student takes an ACT or SAT test more than once, the agency receives the record for the most recent examination taken.
Four values are calculated for this indicator:
(1) Tested. This shows the percent of graduates who took either college admissions test:

> number of graduates who took either the SAT or the ACT
number of graduates
(2) At/Above Criterion. This shows the percent of examinees who scored at or above the criterion score on either test (1110 on the SAT critical reading and mathematics sections combined, or 24 on the ACT composite):
number of examinees who scored at or above criterion
number of examinees
(3) Average SAT Score. This shows the average score for the SAT critical reading, writing,* and mathematics combined, calculated as follows:
total score (critical reading + writing + mathematics) for all students who took the SAT
number of students who took the SAT

* The writing component of the SAT is now included in Average Score. For this reason, average scores are shown only for current year (class of 2012).
(4) Average ACT Score. This shows the average score for the ACT composite, calculated as follows:
total composite score for all students who took the ACT
number of students who took the ACT
See also Criterion Score. (Sources: The College Board, Aug. 2012, J an. 2012; ACT, Inc. (ACT) Oct. 2012, Oct. 2011; and PEIM S, Oct. 2012, Oct. 2011)
School Type: For purposes of creating campus groups, schools are placed into one of four classifications based on the lowest and highest grades in which students are enrolled at the school (i.e. in membership): elementary, middle (including junior high school), secondary, and both elementary/secondary (K-12). Generally speaking, elementary schools are PK-5 or PK - 6 , middle schools are 6-8, and secondary schools are 9-12. Schools with grade spans that do not exactly match these are grouped with the school type most similar to their grade span. For counts of schools in the different low and high grade combinations included with each type see the "2013 A ccountability System School Types Chart" at:

> http://ritter.tea.state.tx.us/perfreport/account/2013/schtype_chart.html

Special Education: This refers to the population of students served in special education programs. A ssessment decisions for students in special education programs are made by their A dmission, Review, and Dismissal (A RD) committee. The ARD committee is made up of the parent(s) or guardian, teacher, administrator, and other concerned parties. In the 2012-13 school year, a student in special education may have been administered the STAAR, STAAR M odified, or STA AR A lternate. R esults from all these assessments are included in the STAAR performance shown on the TAPRs.

Other indicators that include the performance of students in special education are: advanced course/dual enrollment longitudinal, attendance rate, annual dropout rates, college-ready graduates, longitudinal rates, RHSP/DA P, TA K S exit-level cumulative pass rate, and the

Texas Success Initiative. Information that would allow the separation of performance of students in special education on college admissions tests and on A dvanced Placement and International Baccalaureate examinations is not available. Note that in the P rofile section of the report, retention rates are shown separately for special education and non-special education students. See STAAR Special Education Assessments and STAAR Participation. (Source: PEIMS, Oct. 2012, Oct. 2011, and TEA Student Assessment Division)
Special Education Compliance Status: See PBM Special Education M onitoring Results Status.
Special Symbols: The 2012-13 TA PR employs special symbols in the following circumstances:

- An asterisk (*) is used to mask small numbers to comply with the federal Family Educational Rights and Privacy Act (FERPA).
- A dash (-) indicates that no students were in this classification.
- $\mathrm{n} / \mathrm{a}$ indicates that the data are not available or are not applicable.
- A question mark (?) indicates data that are statistically improbable or were reported outside of a reasonable range.
For more information, see the Explanation of $M$ asking at

## http://ritter.tea.state.tx.us/perfreport/tapr/2013/masking.htm|

## STAAR (State of T exas Assessments of Academic Readiness): The State of Texas

A ssessments of A cademic Readiness (STAAR) is a comprehensive testing program for public school students in grades 3-8, and End of Course assessments for high school subjects. The STAAR is designed to measure to what extent a student has learned, understood, and is able to apply the concepts and skills expected at each tested grade level.
The grades and subjects shown on the TA PRs are:

- Grade 3 - reading and mathematics
- Grade 4 - reading, mathematics, and writing
- Grade 5 - reading (first administration only), mathematics (first administration only), and science
- Grade 6 - reading and mathematics
- Grade 7 - reading, mathematics, and writing
- Grade 8 - reading (first administration only), mathematics (first administration only), science, and social studies
- End of Course (EOC): The following 15 EOC assessments were administered in 2013:
- English I Reading, English II Reading, and English III Reading
- English I W riting, English II Writing, and English III W riting
- Algebra I, Geometry, and A Igebra II
- W orld History, W orld Geography, and U.S. History
- Biology, Chemistry, and Physics

Each STAAR test is linked directly to the Texas Essential K nowledge and Skills (TEK S) curriculum. The TEK S is the state-mandated curriculum for Texas public school students. For more information on TEK S, see the Texas Essential K nowledge and Skills website at
http://tea.texas.gov/index2.aspx?id=6148
Note also:
Spanish STAAR. All STAAR tests in grades 3 through 5 are available in either English or Spanish. The TA PR performance shown includes performance on the Spanish STAAR tests.
Standards. The standards for the STAAR in 2013 are as follows:

- Phase-in 1 Level II: Satisfactory. This is the passing standard for 2013.
- Final Level II: Satisfactory. This standard indicates that students are sufficiently prepared for postsecondary success.
M ore information on the phase-in of the STAAR standards can be found at
http://tea.texas.gov/index4.aspx?id=25769814313\& menu id=793
For 2012-13, the TA PR shows the percent passing STAAR in several ways:
- STAAR P ercent at Phase-in 1 Level II or above, By Grade. The first indicator shown on the report is percent passing STAA R by grade for each subject area. Please note the following:
- Student Success Initiative. Only performance from the first administration of grades 5 and 8 reading and mathematics is shown by grade. Results that include the second administration can be found on the TA PRs under Student Success Initiative: STAAR Cumulative M et Standard.
- Test Administrations Included. The results shown are for the first administration in the spring for grades 3-8.
- End-of-Course Assessments. Performance on the EOCs is shown by course. For example, performance on A Igebra I will include the performance of all students who took the Algebral EOC regardless of grades.
- STAAR Percent at Phase-in 1 Level II or above. This is the accountability indicator used to determine the state rating for campuses and districts. N ote the following:
- The first measure combines all subjects and all grades.
- The performance shown includes the outcomes on the STAAR tests given to grades 3-8 and the EOC performance and TAKS grade 11.
- Performance includes the cumulative passing rate from the first and second administrations for grades 5 and 8 reading and mathematics.
- Performance includes the STAAR, STAAR M odified, STAAR A lternate, TAK S, and TAK S A ccommodated assessments.
- Performance includes all STAAR Spanish versions.
- STAAR P ercent at Final Level II or above. This indicator shows the percent of students who are sufficiently prepared for postsecondary success. Note the following:
- The first measure combines all subjects and all grades.
- The performance shown includes the outcomes on the STAAR tests given to grades 3-8 and the EOC performance and TAKS grade 11.
- Performance includes the cumulative passing rate from the first and second administrations for grades 5 and 8 reading and mathematics.
- Performance includes the STAAR, STAAR M odified, STAAR A lternate, TAK S, and TAK S A ccommodated assessments.
- Performance includes all STAAR Spanish versions.
- STAAR P ercent at Level III Advanced. This indicator shows the percent of students who are well prepared for postsecondary success. N ote the following:
- The first measure combines all subjects and all grades. N ote that this indicator counts a student for each assessment he or she took.
- The performance shown includes the outcomes on the STAAR tests given to grades 3-8 and the EOC performance.
- Performance includes the cumulative passing rate from the first and second administrations for grades 5 and 8 reading and mathematics.
- Performance includes the STAAR, STAAR M odified, and STAAR Alternate assessments for all grades and subjects.
- Performance includes all STAAR Spanish versions.
- STAAR Percent M et or Exceeded Progress. This indicator shows the percent of students who met or exceeded the STAAR progress measure as determined by comparing a student's gain score- the difference between the student's current year score and prior year score- to a progress target.
- STAAR Percent Exceeded Progress. This indicator uses the same methodology as above, but shows only the percent of students who exceeded the progress target.

Other important information:

- Rounding of STAAR results. STAAR performance on the TAPR is rounded to whole numbers. For example, $49.877 \%$ is rounded to $50 \%$; $49.4999 \%$ is rounded to $49 \%$; and $59.5 \%$ is rounded to $60 \%$.
- Masking. All STAAR performance is masked for small numbers. For more information see the Explanation of $M$ asking at:

## http://ritter.tea.state.tx.us/perfreport/tapr/2013/masking.html

- Accountability Subset. Only test takers who were enrolled on the last Friday in the previous October are included in the calculations shown on the TA PRs. This is referred to as the "O ctober subset" or the Accountability Subset. For the district, a student who moved into the district after October 26, 2012 (or October 28, 2011 for summer 2012 EOCs) would not have his performance included at the district level. At the campus level, a student who changed to a different campus within the same district after October 26, 2012 (or October 28, 2011 for summer 2012 E OCs) would not have his performance included at that school, although it would be included at the district level. See Accountability Subset for more information.
See STAAR Participation. (Source: TEA Student Assessment Division)

STAAR Participation: This year the definition of participation rate has changed from what was reported on the A EIS reports in the past. The 2012-13 TA PR shows a participation rate based on the answer documents submitted, rather than on students. That is, a test is the unit of analysis for TAPR and a student was the unit of analysis for A EIS. The All Tests participation includes submitted answer documents for every subject administered. W ithin subjects, the percents include answer documents by subject. (Participation rates by subject will be available on the Performance R eporting website in early 2014.)

Participation results from the STAA R, STAA R M odified, STA A R A Iternate, TAK S grade 11, and TELPAS are all included in participation calculation. The details on the participation categories are as follows:

- Tested: answer documents with a score code S or a score code G with alternate category of 2 or 3 or 4 .
- Included in Acct: scored answer documents used in determining the campus or district accountability rating.
- Not in Acct: answer documents counted as participants, but not used in determining the campus or district accountability rating, due to the following reasons
o Mobile. These answer documents were excluded because the students enrolled in the district or campus after the fall PEIM S submission dates (October 26, 2012, or October 28, 2011 for summer 2012 EOCs).
o Other Exclusions. These answer documents were excluded from the rating determination for the following reasons:
+ Answer documents with a score code G and alternate category of 4 (no response observed).
+ A nswer documents for students who were tested only on the TELPAS.
+ A nswer documents for ELL students with years in U.S. school of 1, 2, or 3.
- Not Tested: answer documents with score codes A, 0, or G with alternate category of 1 (not assessed)
- Absent: answer documents with a score code A
- Other: answer documents with score codes 0 or G with alternate category of 1 (not assessed)

The common participation denominator is the sum of these five categories: Included in A cct, M obile, Other Exclusions, A bsent, and Other. Note that STAAR Participation Rate is rounded to whole numbers. For example, $94.49 \%$ is rounded to $94 \%$. Small values may show as zero: $0.4 \%$ is rounded to $0 \%$, and $0.6 \%$ is rounded to $1 \%$. (Source: TEA Student Assessment Division)

STAAR Special Education Assessments: For students receiving special education services, the ARD committee determines which STAAR assessment is appropriate for each student based on his/her individual needs. STAAR, the general assessment option is administered to the majority of students in Texas. For students who cannot be appropriately assessed with STAAR, the STAAR M odified and STAAR A Iternate are the alternate assessments available to those who meet specific participation requirements.
For more information on these assessments, see the Student A ssessment Division website:
http://tea.texas.gov/index4.aspx?id=25769814313\& menu_id=793

Staff Exclusions: These are counts of individuals who serve public school students, but are not included in the FTE totals for any of the other employee statistics. There are two types of these entries: individuals participating in a shared services arrangement and individuals on contract with the district to provide instructional services. Shared Services Arrangement (SSA) Staff work in schools located in districts other than their employing district, or their assigned organization (in PEIM S) shows a code of 751, indicating that they are employed by the fiscal agent of an SSA. Only the portion of a person's total FTE amount associated with the school in another district (or with the 751 organization code) is counted as SSA. SSA staff are grouped into three categories: Professional Staff (which includes teachers, administrators, and professional support); Educational A ides; and A uxiliary Staff. N ote that SSA A uxiliary Staff are identified by the type of fund from which they are paid. Contracted Instructional Staff (District and Campus Profiles) refers to counts of instructors for whom the district has entered into a contractual agreement with some outside organization. Through the contract, the outside organization has committed to supplying instructional staff for the district. They are never employees of the reporting school district. (Source: PEIMS, Oct. 2012)
Student Enrollment by Program: Students are identified as served in programs and/or courses for Special Education, Career and Technical Education, Bilingual/ESL Education, or Gifted and Talented Education. The percentages do not sum to 100, as a student may be enrolled in more than one of these programs. (Source: PEIM S, Oct. 2012)
Student Success Initiative (SSI): For the 2012-13 school year, students in $5^{\text {th }}$ grade needed to pass both the reading and mathematics portions of the STAAR in order to be promoted to $6^{\text {th }}$ grade, and students in $8^{\text {th }}$ grade needed to pass both the reading and mathematics portions of the STAAR in order to be promoted to $9^{\text {th }}$ grade. Students were given three opportunities to pass each required test. In addition to promotion based on passing the test, some students were promoted based on the recommendation of their grade placement committee (GPC). The committee members needed to agree that the student was likely to perform on grade level after receiving accelerated instruction. For 2013, the TA PR shows two measures for each SSI grade and subject:
(1) Students Requiring Accelerated Instruction. For each subject and grade, this shows the percent of students who did not pass the first administration of the STAAR. Students who did not pass the test during the first administration must be provided accelerated instruction in preparation for the second administration:
number of eligible students who did not meet the standard in the first administration
number of eligible students in the first administration
The number of eligible students is calculated from the test answer documents and includes all students who were tested, students who should have been tested but were absent, and students who were not tested for other reasons. Students who were absent during the first administration or were not tested for other reasons are included in the counts of students requiring accelerated instruction.
(2) STAAR Cumulative M et Standard. For each subject and grade, this shows the cumulative (and unduplicated) percent of students who took and passed the tests in the first and second administrations combined:
cumulative number of students who took the test in either of the first two administrations
The values shown for this measure are the ones used in determining state accountability ratings. In most cases, this value does not match the STAAR performance shown by grade in the first few pages of this report. The "by grade" results are based on the first administration of each test only.

The values include results from both the English and Spanish versions of the STAAR for grade 5. All measures also include results for the STAAR M odified and STAAR A Iternate assessments.

For more information, see TEA's Student A ssessment Division SSI site at http://tea.texas.gov/index4.aspx?id=25769814800\& menu_id=793
(Source: TEA Student Assessment Division)
Students by Grade: Percentages are calculated by dividing the number of students in each grade by the total number of students. (Source: PEIM S, Oct. 2012)
Students with Disciplinary Placements: Counts and percents of students placed in alternative education programs under Chapter 37 of the Texas Education Code (Discipline; Law and Order) are shown (for the 2011-12 school year) in the TA PRs. Disciplinary placement counts are obtained from PEIM S records. Districts report the disciplinary actions taken toward students who are removed from the classroom for at least one day. A lthough students can have multiple removals throughout the year, this measure counts students only once and includes only those whose removal results in a placement in a disciplinary alternative education program or juvenile justice alternative education program. It is calculated as follows:
number of students with one or more disciplinary placements
number of students who were in attendance at any time during the school year
For 2012-13, the following 19 action codes on the PEIM S 425 record are included as disciplinary placements: $02,03,04,07,08,10,12,13,14,15,51,52,53,54,55,57,59,60$, and 61. (Source: P EIM S, J une 2012)

TAK S (Texas Assessment of K nowledge and Skills): The performance of grade 11 students on the exit-level TAKS, TAKS (A ccommodated), and TAKS-M is included with the performance of students in grades 3-10 on the STAAR tests.
TAK S Exit-level C umulative Pass R ate (D istrict Performance only): The TA K S cumulative pass rate shows the percent of students who first took the TA K S exit-level test in spring 2012, and eventually passed all TAK S tests taken (in the same district) by spring 2013. (Students who failed the first time had four additional opportunities to retake test(s) before their graduation date.) This measure is intended to show the relative success of districts in their efforts to help all their students pass the exit-level TAK S, which is a requirement for graduation from Texas public schools. Performance on the TAKS (A ccommodated) is included; performance on the TAK S-M and TAK S-A It test is not included.

Test takers included in the TAK S Exit-level C umulative Pass Rate for the class of 2013:

- A ny student who took the TAKS or TAKS (A ccommodated) for the first time in spring 2012.
- All special education students who took any TAKS or TAKS (A ccommodated) test.
- All above students, whether or not they were in the Accountability Subset in spring 2012.

Test takers NOT included in the TAKS Exit-level Cumulative Pass Rate:

- Students who first took the exit-level test in District A, did not pass all sections and then moved to District B and retested. These students are taken out of both the numerator and denominator, whether or not they eventually passed all tests taken.
- Students who moved out of state, left the country, or died before passing all tests taken. These students are in the denominator but not the numerator. They cannot be removed because they are not specifically identified in the data.
- Students who dropped out of school before passing all tests taken are in the denominator but not the numerator.
- Students who moved into the state after the spring of 2012 are not included, even if they took the TAKS and graduated with the class of 2013.
(Source: TEA Student Assessment Division)
Tax Information: This information is now available on the PEIM S F inancial Standard Reports, at http://tea.texas.gov/index2.aspx?id=25769817584.
Teachers by Ethnicity and Sex: These are counts of teacher FTEs by ethnic groups and by sex. Counts are al so expressed as a percent of the total teacher FTEs. (Source: PEIMS, Oct. 2012)
Teachers by Highest Degree Held (District P rofile only): This shows the distribution of degrees attained by teachers in the district. The FTE counts of teachers with no degree, bachelor's, master's, and doctorate degrees are expressed as a percent of the total teacher FTEs. (Source: PEIM S, Oct. 2012)
Teachers by Program (population served): Teacher FTE counts are categorized by the type of student populations served. Regular education, special education, compensatory education, career and technical education, bilingual/ESL education, gifted and talented education, and miscellaneous other populations served are shown. Teacher FTE values are allocated across population types for teachers who serve multiple population types. Percentages are expressed as a percent of total teacher FTEs. (Source: PEIM S, Oct. 2012)
Teachers by Y ears of Experience (District Profile only): This is the FTE count of teachers with years of professional experience that fall into the ranges shown. Experience in these categories is the total years of experience for the individual, not years of experience in the reporting district or campus. Teacher counts within each range of experience are expressed as a percent of total teacher FTEs. A beginning teacher is a teacher reported with zero years of experience. (Source: PEIMS, Oct. 2012)
Texas Success Initiative (TSI) - Higher E ducation Readiness C omponent: The Texas Success Initiative (TSI) is a program designed to improve student success in college. It
requires students to be assessed in reading, writing and mathematics skills prior to enrolling in college, and to be advised based on the results of that assessment.
The TAPRs show the percent of students who were exempted from taking a test for the Texas Success Initiative because they had a high enough score on their exit-level TAKS tests for mathematics and English language arts, as set by the Texas Higher Education Coordinating Board (THECB). The qualifying scores are scale scores of 2200 on their TAKS mathematics and English language arts with a written composition score of 3 or higher on the writing component. This indicator shows the percent of students who achieved this level of proficiency by subject (English language arts and mathematics) for 2013 and 2012. Note also:
- This indicator is subject to accountability subset rules.
- Performance is disaggregated according to the new definitions for race and ethnicity for both current year (2013) and prior year (2012).
- TAKS M odified and TAKS Alternate performance is not included. THECB's standard of college readiness on the exit-level TAKS does not apply to these alternate assessments because students are not required to pass the TAKS M odified or TAKS A Iternate in order to graduate.
Total Staff: Total staff includes professional staff (teachers, professional support, administrators), educational aides, and (on the district profile) auxiliary staff. M inority staff is the sum of the FTE counts for all non-white staff groups (A frican A merican, Hispanic, A merican Indian, A sian, Pacific Islander, and Two or M ore Races). The minority staff FTE count is expressed as a percent of the total staff FTE. (Source: PEIM S, Oct. 2012)
Total Students: This is the total number of public school students who were reported in membership on October 26, 2012, at any grade, from early childhood education through grade 12. M embership is a slightly different number from enrollment, because it does not include those students who are served in the district for less than two hours per day. For example, the count of Total Students excludes students who attend a nonpublic school but receive some services, such as speech therapy-for less than two hours per day-from their local public school district. (Source: PEIMS, Oct. 2012)
TSI: See Texas Success Initiative.
Turnover R ate for Teachers (District P rofile only): This percent shows the total FTE count of teachers from the fall of 2011-12 who were subsequently not employed in the district in the fall of 2012-13, divided by the total teacher FTE count for the fall of 2011-12. Social security numbers for teachers employed in the district in the fall of 2011-12 were checked to verify their employment status in the same district in the fall of 2012-13. Staff who remained employed in the district but not as teachers were al so counted toward teacher turnover. (Source: PEIMS, Oct. 2012, Oct. 2011)

## Who to Call

Information about the calculation of all Texas Academic Performance Report (TAPR) data elements is provided in this Glossary. If, after reading the Glossary you have questions about the calculation of TAPR indicators, contact Performance Reporting at (512) 463-9704.

Questions related to programs and policies for the following subjects should be directed to the contacts listed below.

| Subject | Contact | Number |

## PBM Special Education Monitoring Results Status

The system of special education monitoring is aligned with other PBM activities through the use of graduated interventions based on indicators of school district and charter school performance and program effectiveness. These indicators are part of the Performance-Based Monitoring Analysis System (PBMAS). Overall results on the PBMAS indicators, as well as instances of low performance on individual PBMAS indicators, are taken into account in determining required levels of intervention. The individual indicators address issues related to student participation in, and performance on, assessment instruments; graduation and dropout rates; over-identification of students for special education programs; disproportionate student representation based on race or ethnicity or on limited English proficiency; and disciplinary actions. District and charter special education data are reviewed regularly as are complaints filed with TEA about special education services. For further information or questions about this status, please contact the Program Monitoring and Interventions Division at (512) 463-5226. The "as of date" for the statuses reported in the 2012-13 Texas Academic Performance Report (TAPR) is September 2013.
The definitions of each program status category are:

- Local Interventions Implemented. The LEA completed a local review process by a specified date as required in Stages 1 and 2 Intervention and retained materials and templates at the LEA.
- Completed: Routine Follow-up. The LEA data and documentation met TEA requirements for completion of process. TEA will monitor implementation of the improvement.
- Completed: Noncompliance Follow-up. The LEA data and documentation met TEA requirements for completion of process. TEA will monitor implementation of the improvement and systemic correction of areas of noncompliance identified by the review.
- Pending Improvement Plan Resubmission. TEA review determined that one or more areas of the CIP did not meet minimum TEA requirements, and revision was necessary.
- Pending TEA On-Site Action. TEA review determined that: appropriate implementation of TEA monitoring processes, including submission of accurate data, appropriate implementation of intervention requirements, and/or appropriate implementation of the improvement plan, could not be verified through LEA documentation; imminent program performance and/or effectiveness concerns exist; and/or ongoing noncompliance for more than one year is identified, resulting in an on-site review to determine additional TEA intervention.
- TEA On-Site Action Completed: Routine Follow-up. TEA has completed an on-site review of the LEA program. As a result, the LEA has implemented and/or revised an improvement plan. TEA will monitor implementation of the improvement plan.
- TEA On-Site Action Completed: Noncompliance Follow-up. TEA has completed an on-site review of the LEA program. As a result, the LEA has implemented and/or revised an improvement plan that includes actions to address noncompliance with program requirements. TEA will monitor implementation of the improvement plan and systemic correction of areas of noncompliance identified by the review.
- Year After TEA On-Site Action: Routine Follow-up. TEA completed an on-site review of the LEA program in the prior year. As a result, the LEA implemented and/or revised an improvement plan that continued throughout the subsequent year. TEA continues to monitor implementation of the improvement plan.
- Year After TEA On-Site Action: Noncompliance Follow-up. TEA completed an on-site review of the LEA program during the prior year. As a result the LEA implemented and/or revised an improvement plan that included actions to address noncompliance with program requirements, and the improvement plan continued throughout the subsequent year. TEA continues to monitor implementation of the improvement plan and systemic correction of areas of noncompliance identified by the review.
- Year After TEA On-Site Action: Pending Report. TEA has completed an on-site review of the LEA program. The on-site review report of findings is pending.
- Year After TEA On-Site Action: Pending Improvement Plan Submission. TEA has completed an on-site review of the LEA program. The LEA is developing an improvement plan that includes actions to address noncompliance with program requirements.
- TEA On-Site Action Completed: Oversight/Sanction/Intervention. TEA has completed an on-site review of the LEA program. As a result: ongoing noncompliance for longer than one year was identified/confirmed; appropriate implementation of the TEA monitoring process, including submission of accurate data and appropriate implementation of intervention requirements, could not be verified; and/or improvement plan implementation was not proceeding as appropriate for the LEA. TEA oversight, sanctions, and interventions were implemented as a result.
- Pending Random Data Verification. Regardless of whether a stage of intervention initially was assigned, an LEA may be subject to random selection for data review to ensure the integrity of monitoring system data and appropriate implementation of the program.
- Pending Random Process Verification. Regardless of review results or stage of intervention, an LEA may be subject to random selection for process review to ensure the integrity of the implementation of the monitoring system, including data reporting and accuracy of findings.
- Oversight/Sanction/Intervention. TEA oversight, sanctions, and interventions were implemented under the following circumstances: (a) the second improvement plan submission of an LEA at Stage 3 or Stage 4 Intervention was not adequate; (b) the improvement plan of an LEA was not adequately developed after an on-site review; (c) ongoing noncompliance for longer than one year was identified; (d) the implementation of the improvement plan was not proceeding as appropriate for any LEA; (e) the LEA previously was assigned on-site interventions and remained under escalated oversight during the period of transition after removal of those interventions; or (f) TEA could not verify appropriate implementation of TEA monitoring processes, including submission of accurate data, appropriate implementation of intervention requirements, and/or appropriate implementation of a CIP.
- On-Site Intervention Assigned. TEA has assigned a technical assistance team, special purpose monitor, conservator, or management team to oversee correction of noncompliance and/or implementation of program and monitoring requirements.
- LEA Closure. The LEA was closed as a result of TEA sanctions.
- Proposed Charter Non-Renewal. The charter school has been notified of TEA's intent not to renew the charter.
- Charter Operations Suspended. The operations of the charter school were suspended by the Commissioner of Education or by the governing board of the charter school.
- In Review. TEA had not completed initial review of the information submitted by the LEA.

No status is shown for LEAs not selected for PBM intervention for special education program areas.

[^0]:    ${ }^{\dagger}$ Due to changes in legislation, the performance report formerly known as the A cademic Excellence Indicator System (A EIS) report is now the Texas A cademic Performance Report (TA PR).
